Fabtech college of Engineering and Research Sangola.

7.5

## PERSONAL PROJECTS

### Food Delivery System

- An online food ordering system which simplifies the food ordering process. The online food ordering system provides convenience for the customers. This system will allow hotels and restaurants to increase scope of business by reducing the labor cost involved.
- For restaurants, it provides tools to manage menus, process orders, and analyze sales. Delivery personnel receive order assignments and navigation assistance, ensuring timely service. Overall, the system streamlines the entire food ordering and delivery process for customers.

### Online Attendance Management System

- The purpose of developing attendance management system is to computerize the traditional way of taking attendance. It facilitates to access the attendance information of a particular student.
- The system allows administrators and authorized staff to mark attendance in real time using multiple methods such as manual web entry, with mobile applications. Users, such as students or employees, can securely log in to view their attendance history, monitor their presence percentage, and submit leave requests without physical paperwork.
